WHAT IS CLAIMED IS:

1	1.	A circuit board assembly, comprising:	
2		a first board on which electric wires are wired, the first board including	
3	a first	a first part having a first thickness and a second part continued from the first	
4	part ar	part and having a second thickness smaller than the first thickness; and	
5		a second board on which bus bars are arranged, the second board	
6	dispos	disposed on the second part of the first board.	
1	2.	The circuit board assembly as set forth in claim 1, wherein:	
2		the second part is defined by forming stepped portions in both main	
3	faces	faces of the first board; and	
4		the second board is disposed on each of the stepped portion.	
1	3.	The circuit board assembly as set forth in claim 1, wherein the second	
2	board has a third thickness which is determined such that an additiona		
3	thickne	thickness of the second thickness and the third thickness is not greater than	
4	the fire	the first thickness.	
1	4.	The circuit board assembly as set forth in claim 1, wherein the second	
2	board	board is formed with grooves for receiving the bus bars.	
1	5.	The circuit board assembly as set forth in claim 1, wherein the electric	
2	wires a	wires and the bus bars are electrically connected.	

- 1 6. The circuit board assembly as set forth in claim 2, wherein the second
- 2 board disposed on one of the stepped portion is fixed on another board on
- 3 which electric wires are wired.

5
